The "5-Level Trust Shield" (Vetting Process).

1. **Professional Verification (NMCN)** We don't just take their word for it. Every nurse must provide their Nursing and Midwifery Council of Nigeria (NMCN) license. We verify these directly with the council's portal to ensure they are active and in good standing.

2.. **Identity & Background Security Safety** is our priority. Our vetting includes: • NIN Verification: Cross-referencing National Identity Numbers.

- **Guarantor Checks:** We require two credible physical guarantors (e.g., a community leader, a senior civil servant, or a long-term employer) who are interviewed by our security team

- **Address Verification:** We physically visit the homes of our staff before they ever step into yours.

3. **Clinical Competency Assessment** Being a nurse on paper isn't enough. Our Lead Nurse conducts a practical "skills test" covering: • Emergency response protocols. • Proper use of medical equipment (BP monitors, Glucometers). • Patient handling and bedside manner.

4. **Health & Sanitization Screening** To protect our patients, especially the elderly and infants, all our staff undergo medical screenings for infectious diseases. We ensure our team is fit to provide care in a home environment.

5. **Continuous Training & Ethics** Once hired, our nurses undergo mandatory training in Home Care Ethics and Patient Privacy. We teach them how to be "invisible" but attentive, respecting the boundaries of Lagos.
